

**CLASSIC RANGE SECTIONAL DOOR**

# ENGINEERED TO BE BETTER

Taurean® Classic Range Sectional Doors have been precision engineered to be the best in the market, with an innovative design and made with only the highest-quality materials.

Made in Australia to suit Australian customers, our Sectional Door range is rigorously tested to withstand a lifetime of normal use. There's a lifetime warranty on springs, 0.6mm G2NS steel as standard, and our extensive colour range will last 10+ years in Australian conditions.

## OUR PHILOSOPHY

At Taurean® Door Systems we're committed to creating an exceptional range of garage doors and have the track record to prove it. Each door is designed to surprise with its stylish good looks and strength.

### SMOOTHER

Most garage doors are made using steel curves and tracks. Taurean® Sectional Doors have innovative nylon bearing wheels and a polymer curve, which allows for a smoother motion and a door that's easier to open and close.

### QUIETER

Taurean® is the only provider that uses hinges made of steel for strength, and with the addition of plastic inserts for quiet movement. We won't compromise on quality, and we believe you shouldn't have to compromise between a door that's tough and a door that's quiet.

### MORE STYLISH

The industry standard for weather sealing is an unattractive aluminium strip with a plastic seal that is clearly visible at the bottom of the garage door. We have developed a co-extruded bottom rail that smoothly blends the door with your driveway without the aluminium strip, providing a more stylish seal.

## CLASSIC RANGE SECTIONAL DOORS

Four design styles each available in Colorbond® steel equates to over 80 design options, tailored to you.
