

***PROTECT YOUR BUSINESS  
WITH TAUREAN® ROLLER  
SHUTTERS***

## The Secura-T Roller Shutter Range

With a roller shutter from the Taurean® Secura-T Roller Shutter Range you get a robust, long lasting roller shutter that will operate safely for many years. Secura-T's traditional designs are constructed with interlocking slats - solid, perforated or slotted, which suit openings for commercial factories, sheds, underground car park facilities and many other applications. Secura-T roller shutters are available in a variety of sizes, small and large to cater for most commercial and industrial situations.

Every Secura-T roller shutter is engineered and custom built specifically for each project so you know your shutter will perform every day even under the most demanding conditions. Secura-T roller shutters are designed to perform and built to last.

### Taurean® Door Systems is strong in history

Taurean® Door Systems is part of the Fletcher Building Group and has grown from two great Australian companies, Stramit® and Creeks. So our customers can be reassured that the products they buy are backed by many years of proven performance. Today our key values that drive us forward are the same as they have always been; **innovation, reliability, security** and **safety**.

### Taurean® Secura-T Roller Shutters are designed to perform, built to last

- Australian designed and manufactured
- Custom built
- Seamless structural pipe to ensure optimum life
- Balanced, smooth, quiet operation
- High quality spring system means peace of mind and years of operation
- Manufactured in large sizes
- Wide range of powder coated colours

### Warranty

Taurean® Roller Shutters carry a 12 month warranty against defects from the date of purchase. For more details please refer to the Taurean® Door Systems website [www.taureands.com.au](http://www.taureands.com.au)

### Taurean® Secura-T Roller Shutters for real peace of mind

#### Wind locking

Around Australia commercial properties in many areas are subjected to high wind conditions and extra protection is required.

Secura-T roller shutters can be engineered and manufactured with wind lock features to improve their operation under these extreme wind pressures to give you peace of mind.

#### Wicket Gates

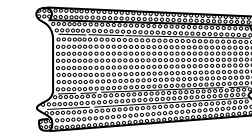

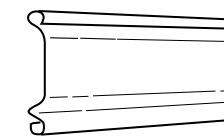

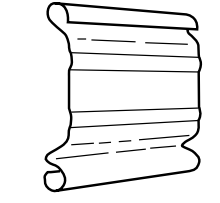

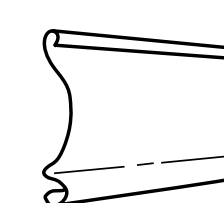

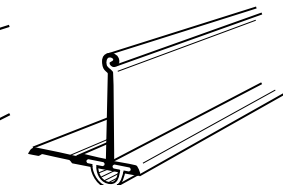

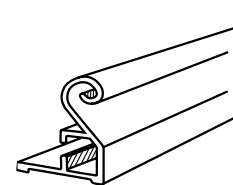

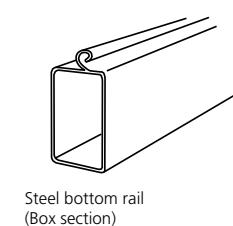

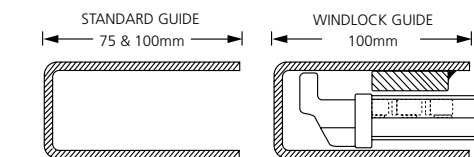

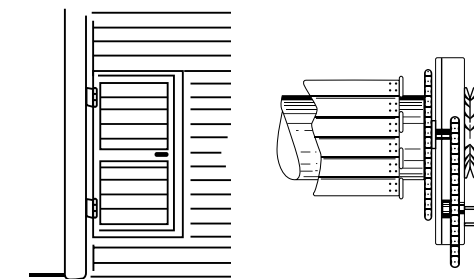

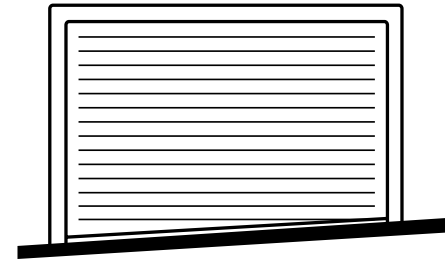

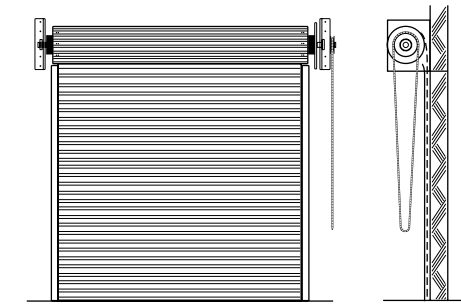

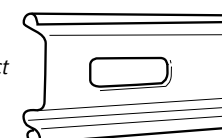

Some properties only have the commercial entry into the building meaning the whole shutter needs to be opened every time, which can be inconvenient, costly and time consuming. Fitting a Wicket Gate can solve this and allow more easy access to the property. Sentinel shutters can be easily designed to include a wicket gate just for this application, saving time and money.

#### Electric Operation

Although a Secura-T roller shutter can be hand operated an electric motor can be fitted for convenience and speed of opening and closing. Adding battery backup means there are no worries even if the power fails, the Secura-T roller shutter still operates. Extra features like travel limit switches, wall mounted control, card readers, key switches, even multiple hand transmitters are easy to add giving your Secura-T roller shutter almost unlimited performance abilities.

Note: Optional secure access systems are available, please contact your representative for more information.

Taurean Door Systems  
Unit 3/1464 Ferntree Gully Road, Knoxfield, Victoria 3180
